

pumps, their maintenance, water committees, latrines, water borne diseases, women's workload, soap, extension, village government, water quality

gender issues, community development (including stakeholders rich and poor, institutions), technology (concerned with water and sanitation), and extension (concerned with the spread of hygiene and sanitation knowledge).

Each group was given a task consisting of three questions:

- what was the situation in the village at the beginning of the project?
- what is the situation now?
- what indicators could we use to measure the results, changes, successes, failures of the activities carried out by the project?
